Our test is on _____

Equal Parts:

- You should be able to identify and equally section shapes according to a fraction.

Example: Section the following shape into fifths.

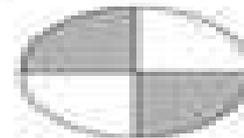

Example: The following shape is sectioned into equal parts. What is the name for each shape?

- Identify the fraction of shaded and not shaded parts of a shape.

Example: What fraction in the shapes below is shaded? Not shaded?

Equalities On a Number Line:

- You should know how to create a fraction number line. Draw a line and place zero on one end and the number 1 at the other. You will section off the line into equal parts according to the denominator. Then, the numerator tells you how many equal parts to move. Take a look at my example below of how I identified $3/4$.

Now you try! On Line A identify $2/5$ and on Line B identify $3/6$.

Line A

Line B

*** Be sure you know what zero and one looks like for the different fractions! ***
