FIGURATIVE LANGUAGE

Figurative language is a fun and creative way to make writing more interesting and expressive.

A simile is a comparison of two things using "like" or "as."

For example, "Her smile was as bright as the sun."

A metaphor is a comparison of two things without using "like" or "as."

For example, "The world is a stage."

Personification is giving human qualities to non-human things.

For example, "The wind whispered through the trees."

Hyperbole is an exaggeration used to emphasize a point.

For example, "I'm so hungry I could eat a horse!"

Idioms are phrases that have a different meaning than what the words actually say.

For example, "It's raining cats and dogs."

The Functions of Figurative Language in Psychotherapy Lawrence Shapiro,1999   Cognitive Pragmatics Hans-Jörg Schmid,2012-08-31 Speakers tend to compose their utterances in such a way that the message they want to get across is hardly ever fully encoded by the meanings of the words and the grammar they use Instead speakers rely on hearers adding conceptual and emotive content while interpreting the contextually appropriate meanings and intentions behind utterances This insight which is of course particularly relevant in all kinds of indirect figurative or humorous talk lies at the heart of the linguistic discipline of pragmatics If pragmatics is the study of meaning in context then cognitive pragmatics can be broadly defined as encompassing the study of the cognitive principles and processes involved in the construal of meaning in context While it would seem only natural that pragmatics as such should have addressed such cognitive issues anyway it has mainly been due to the historical rooting of this discipline in the philosophy of language that psychological aspects have not been in the pragmatic limelight to date Being part of the 9 volume series Handbooks of Pragmatics this volume is the first to systematically survey this terrain from a wide range of perspectives It collects state of the art contributions by leading experts from the fields of pragmatics psycholinguistics cognitive linguistics clinical linguistics and historical linguistics The volume is divided into four parts which tackle the following questions Part I The cognitive principles of pragmatic competence What are the general cognitive principles underlying pragmatic competence i e the skill to arrive at context dependent meanings of utterances What are the cognitive underpinnings of language users ability to compute or infer intended meanings in the role of hearers and to give hints as to how to decode intended meanings in the role of speakers Part II The psychology of pragmatics What are the actual cognitive processes taking place during online construal of meaning in context on the basis of encoded messages How is pragmatic competence acquired in childhood What are the types sources and effects of pragmatic disorders i e impairments of pragmatic competence Part III The construal of non explicit and non literal meaning in context What are the cognitive principles and processes involved in the construal of meanings of non explicit and indirect utterances How do we process figurative meanings humour and gestures Part IV The emergence of linguistic structures from meaning in context What are the repercussions of the repeated construal of context dependent meanings on linguistic structures and the linguistic system How does the system change under the influence of the construal of meanings in social situations Reduced series price print available degruyter de rhenus com   Establishing Predominance of English for Specific Purposes within Adult English Language Teaching Nijolė Burkšaitienė,Nadežda Stojković,2019-01-22 English for Specific Purposes ESP has accumulated substantial tradition in practice research and theory It is a common approach in English Language Teaching ELT among adults today starting with high schools then in academia pre and in service training and life long learning programs The role of ESP in each of these is to facilitate work in today s inevitably international business and scientific environment It provides language training based on the precise simulation of

communicative situations found in the surroundings for which learners are preparing including for example domain specific vocabulary syntactic and morphological structures text and speech content structuring stylistics intercultural competence At present when English is present either as a foreign or second language learning General English GE is to a large degree accomplished before learners start needing English for their jobs In this way ESP does not complete GE but builds upon the foundations laid by it in learners prior education ESP is a channel of communication for the contemporary academia and economics However even so these are still early days for ESP as it does not yet have a recognised place within academia Only very recently have we begun to witness the occasional but encouraging emergence of ESP academic courses and departments This book thus explores practice and research conducted and under way in this field of ELT in order to assist its recognition as an autonomous academic discipline **The Function of Imagery and Symbolism used by William Faulkner in "A Rose for Emily"** Daria Poklad,2016-10-12 Seminar paper from the year 2009 in the subject English Language and Literature Studies Literature grade 1 3 language English abstract William Faulkner s short story A Rose for Emily is often regarded as a story of horror with gothic elements due to its creepy and shocking final scene Moreover different themes such as the loss of beloved ones isolation and the refusal to accept change are covered in this story There is also a variety of popular readings of A Rose for Emily emphasizing the conflict between the North and the South or the conflict between individual and the community between the past and the present between men and women The question is of how the author depicts such complexity of character emotion and setting Faulkner himself said that in a short story almost every word has got to be almost exactly right Petry 54 As a result almost every word in a short story has a greater meaning which is achieved using imagery and symbolism Imagery is the representation of experiences of the senses which uses descriptive but also figurative language whereas symbolism is used by writers to invest objects actions or ideas with a symbolic meaning The symbols convey special meanings to the reader standing for one single idea or many This paper will analyze the function and use of imagery and symbolism in A Rose for Emily focusing on the functions of the house how the picture of Emily is drawn the function of the town the characterization of the men in the protagonist s life then the aspect of time and finally the attempt to analyze the symbol of the rose in the title trying to reveal a much imagery and symbolic meaning as possible It will be shown that a Rose for Emily is complex and rich in imagery symbolism and ambiguity used by Faulkner to characterize people describe relations and atmosphere **Current Perspectives on Vocabulary Learning and Teaching** Nuray Alagözlü,Vedat Kiymazarslan,2020-07-13 This book brings together current perspectives and up to date research on vocabulary teaching and the learning of a foreign or second language It will serve as a basis for academic studies and can be used as a supplementary source for vocabulary courses in English language teacher training programs Featuring contributors from Cyprus Greece Italy Spain and Turkey who detail their experiences of language teaching in different cultural contexts this collection is valuable as it reflects theory and practice at work in different settings on

vocabulary acquisition teaching vocabulary to young learner and vocabulary teaching and learning strategies The volume also provides insights into the use of technology in vocabulary teaching and details various forms of vocabulary testing

Lai,2016-03-09 Metaphor has been an issue of intense research and debate for decades see for example 1 Researchers in various disciplines including linguistics psychology computer science education and philosophy have developed a variety of theories and much progress has been made 2 For one metaphor is no longer considered a rhetorical flourish that is found mainly in literary texts Rather linguists have shown that metaphor is a pervasive phenomenon in everyday language a major force in the development of new word meanings and the source of at least some grammatical function words 3 Indeed one of the most influential theories of metaphor involves the suggestion that the commonality of metaphoric language results because cross domain mappings are a major determinant in the organization of semantic memory as cognitive and neural resources for dealing with concrete domains are recruited for the conceptualization of more abstract ones 4 Researchers in cognitive neuroscience have explored whether particular kinds of brain damage are associated with metaphor production and comprehension deficits and whether similar brain regions are recruited when healthy adults understand the literal and metaphorical meanings of the same words see 5 for a review

Whereas early research on this topic focused on the issue of the role of hemispheric asymmetry in the comprehension and production of metaphors 6 in recent years cognitive neuroscientists have argued that metaphor is not a monolithic category and that metaphor processing varies as a function of numerous factors including the novelty or conventionality of a particular metaphoric expression its part of speech and the extent of contextual support for the metaphoric meaning see e g 7 8 9 Moreover recent developments in cognitive neuroscience point to a sensorimotor basis for many concrete concepts and raise the issue of whether these mechanisms are ever recruited to process more abstract domains 10 This Frontiers Research Topic brings together contributions from researchers in cognitive neuroscience whose work involves the study of metaphor in language and thought in order to promote the development of the neuroscientific investigation of metaphor Adopting an interdisciplinary perspective it synthesizes current findings on the cognitive neuroscience of metaphor provides a forum for voicing novel perspectives and promotes avenues for new research on the metaphorical brain 1 Arbib M A 1989 The metaphorical brain 2 Neural networks and beyond John Wiley Sons Inc 2 Gibbs Jr R W Ed 2008 The Cambridge handbook of metaphor and thought Cambridge University Press 3 Sweetser Eve E Grammaticalization and semantic bleaching Annual Meeting of the Berkeley Linguistics Society Vol 14 2011 4 Lakoff G Johnson M 1999 Philosophy in the flesh The embodied mind and its challenge to western thought Basic books 5 Coulson S 2008 Metaphor comprehension and the brain The Cambridge handbook of metaphor and thought 177 194 6 Winner E Gardner H 1977 The comprehension of metaphor in brain damaged patients Brain 100 4 717 729 7 Coulson S Van Petten C 2007 A special role for the right hemisphere in metaphor comprehension ERP evidence from hemifield presentation Brain Research 1146 128 145 8 Lai V T Curran T Menn L 2009 Comprehending conventional and novel metaphors An ERP study Brain Research 1284 145 155 9 Schmidt G L Kranjec A Cardillo E R Chatterjee A 2010 Beyond laterality a critical assessment of research on the neural basis of metaphor Journal of the International Neuropsychological Society 16 01 1 5 10 Desai R H Binder J R Conant L L Mano Q R Seidenberg M S 2011 The neural career of sensory motor metaphors Journal of Cognitive Neuroscience 23 9 2376 2386   Mechanisms and Functions of Brain and Behavioural Asymmetries Royal Society (Great Britain).
