Yi Man Li,Xuefeng Shao,James Crabbe,2023-10-20 Carbon neutrality refers to net zero carbon emissions It can be achieved
by reducing carbon emissions or increasing carbon adsorption The popularity of social media including Twitter YouTube and
LinkedIn provides good channels for sharing relevant information and promoting sustainable carbon neutral living styles For
example a motor company has launched social media challenges with Korean pop stars to raise awareness of carbon
neutrality Social media provides real time information In Jakarta flood related tweet intensity during a flood peaked at about
900 tweets a minute during the floods of 2015 The tweets created real time maps that people sent a minute before Regarding
government policies identification of problem areas is needed to help policymakers to resolve problems Machine learning can
monitor these events by studying past records to know how countries and governments performed in a high risk event or
environmental crisis and this data can be used to provide future recommendations to governments for policy making
Additionally AI can analyze online unstructured data and predict various scenarios of carbon emissions and adsorptions using
structured data The world of social media is a huge data source still yet to be fully optimized in science "Code of
