in the educational and clinical settings it seems fundamentally important to shed more light on the limits and potential of this line of research. The aim of the research discussed here is to generate new evidence on the feasibility of training WM individuals with LD and ID. There are several questions that could be raised in this field. For a start, can WM be trained in this population? Are there some aspects of WM that can be trained more easily than others? Can a WM training reduce the impact of LD and ID on learning outcomes and on everyday living? What kind of training program is best suited to the promotion of such changes?

**Medical Image Computing and Computer-Assisted Intervention - MICCAI 2002** Takeyoshi Dohi, Ron Kikins, 2003-06-30. The fifth international Conference in Medical Image Computing and Computer Assisted Intervention MICCAI 2002 was held in Tokyo from September 25th to 28th 2002. This was the first time that the conference was held in Asia since its foundation in 1998. The objective of the conference is to offer clinicians and scientists the opportunity to collaboratively create and explore the new medical field. Specifically MICCAI offers a forum for the discussion of the state of art in computer assisted interventions, medical robotics and image processing among experts from multi disciplinary professions including but not limited to clinical doctors, computer scientists and mechanical and biomedical engineers. The expectations of society are very high, the advancement of medicine will depend on computer and device technology in coming decades as they did in the last decades. We received 321 manuscripts of which 41 were chosen for oral presentation and 143 for poster presentation. Each paper has been included in these proceedings in eight page full paper format without any differentiation between oral and poster papers. Adherence to this full paper format along with the increased number of manuscripts surpassing all our expectations has led us to issue two proceedings volumes for the first time in MICCAI's history. Keeping to a single volume by assigning fewer pages to each paper was certainly an option for us considering our budget constraints. However we decided to increase the volume to offer authors maximum opportunity to argue the state of art in their work and to initiate constructive discussions among the MICCAI audience.
