6. Explain why the human brain is so large compared to that of other mammals:

It is thought to be related to the complexity of human behavior.

1802 Chapter 1: Section 1: Questions

1. Describe the structure of the human brain and explain how it is related to the complexity of human behavior:

The human brain is a large, complex organ. It is thought to be related to the complexity of human behavior. The brain is divided into several regions, each of which is thought to be responsible for a different function. The cerebral cortex is the largest and most complex region of the brain. It is thought to be responsible for higher-level functions such as reasoning, planning, and problem-solving. The cerebellum is a smaller region of the brain that is thought to be responsible for motor control and coordination. The brainstem is the base of the brain and is thought to be responsible for basic functions such as breathing and heart rate.

2. Explain why the human brain is so large compared to that of other mammals:

It is thought to be related to the complexity of human behavior. The human brain is larger than that of other mammals because of the need for a larger brain to support the complex tasks of human behavior. The brain is a highly energy-consuming organ, and a larger brain requires more energy to maintain. This is why larger mammals have larger brains.

3. Describe the structure of the human brain and explain how it is related to the complexity of human behavior:
