*Computational Intelligence in Time Series Forecasting* Ajoy K. Palit, Dobrivoje Popovic, 2006-01-04 Foresight in an engineering enterprise can make the difference between success and failure and can be vital to the effective control of industrial systems Applying time series analysis in the on line milieu of most industrial plants has been problematic owing to the time and computational effort required The advent of soft computing tools offers a solution The authors harness the power of intelligent technologies individually and in combination Examples of the particular systems and processes susceptible to each technique are investigated cultivating a comprehensive exposition of the improvements on offer in quality model building and predictive control and the selection of appropriate tools from the plethora available Application oriented engineers in process control manufacturing production industry and research centres will find much to interest them in this book It is suitable for industrial training purposes as well as serving as valuable reference material for experimental researchers
