Multiplying and Dividing Fractions Study Guide

Note

When multiplying fractions, you will multiply the numerators together and multiply the denominators together.

Example

$$\frac{1}{2} \times \frac{3}{4} = \frac{1 \times 3}{2 \times 4}$$

When dividing fractions, you first must calculate the reciprocal of the dividing fraction and then multiply the numerators together and multiply the denominators together.

Example

$$\frac{1}{4} \div \frac{4}{5} \longrightarrow \frac{1}{4} \times \frac{5}{4}$$

A **proper fraction** is a fraction whose numerator is smaller than its denominator.
An **improper fraction** is a fraction whose numerator is equal to or greater than its denominator.

Working

Numerator: the number above the line in a fraction

Denominator: the number below the line in a fraction

Reciprocal: the multiplicative inverse of a number

Real number: a number between whole numbers (e.g., $\frac{1}{2}$)
