**b) Theory**

Fair value is defined as 'the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date'.

Fair value is measured without deducting transaction costs, but takes into account:

- actual and potential uses;
- the market conditions at the end of the reporting period;
- rental incomes; and
- future market conditions.

IAS 40 recommends, but does not require, that this fair value be measured based on a valuation performed by an independent and suitably qualified valuator. Instead, the measurement of the fair value must simply be in accordance with IFRS 13 *Fair Value measurement*.
