Forensic document examiners provide their findings as expert testimony in court. Due to rapid changes in technology including digital documents, printing and photocopying capabilities and more, there is a great need for this up-to-date reference. The examination of documents can include comparison of handwriting or hand printing, detection of alterations or photocopies and computer manipulation, restoration or decipherment of erased and obliterated writing, visualization of latent impressions, the identification of printing processes and differentiation of inks. Computer-generated documents are prevalent and electronically captured signatures are becoming more widespread, meaning the knowledge of advances in technology and adoption of new validated techniques and methods of document examination are crucial to the reliability of forensic opinions. Forensic Document Examination in the 21st Century includes the latest research on the subject and with contributions from leading experts on their various areas of expertise. **Journal of Police Science and Administration**, 1987 **Louisiana Bar Journal**, 1999 **The North Carolina State Bar Journal**, 1997 *Fraud Examination* Joseph T. Wells, 1992-03-23 Fraud examination is a specialized methodology for resolving allegations of wrongdoing. The author states that traditional auditing techniques are insufficient for uncovering fraud in business and government and offers an alternative approach. Fraud examination consists of specialized knowledge

from four fields accounting and auditing investigation law and criminology Each of these fields are covered in detail as they relate to fraud and white collar crime thereby increasing the knowledge necessary to fight the ever increasing fraud problem The professional interested in uncovering or documenting fraud must not only know how to discover it in the books and records He or she must know how to recognize fraud symptoms how to obtain evidence take statements and write reports to testify to findings and to assist in the prevention and detection of fraud According to most authorities fraud in business and government is at an all time high The responsibilities of the auditor and accountant to detect and deter fraud and white collar crime are increasing and yet they catch few frauds before devastating losses occur In the view of Joseph T Wells this is because accountants and auditors wrongfully assume fraud can be detected and prevented through traditional audit techniques Instead the author suggests that auditors accountants and loss prevention professionals must find a new approach Fraud examination is defined as the skills necessary to resolve allegations of fraud from inception to disposition to obtain evidence take statements and write reports to testify to findings and to assist in the detection and prevention of fraud Fraud examination consists of specialized knowledge from four fields accounting and auditing investigation law and criminology The book begins with a section on criminology which explains the various theories of why some persons commit crimes and others do not A special emphasis is given to the theories of the white collar offender The next section law gives the reader a broad knowledge of the courts how they operate and the various procedures for proving fraud matters It also details the various criminal and civil statutes by which fraud offenders are punished The third section auditing provides the reader with specific techniques to examine books and records for fraudulent activity Net worth analysis a methodology for proving ill gotten gains is explored in detail The final section investigation provides techniques on how best to obtain information through interview methods It also covers confidential sources of information as well as writing reports in fraud related cases This book is specifically designed for the person who not only wants to know about fraud but what to do with it in the event it is suspected
