Human Geography in Action Michael Kuby, John Harner, Patricia Gober, 2013-01-14 Michael Kuby's 6th edition of *Human Geography in Action* is comprised of 14 stimulating concept based chapters. The text aims to develop geographic problem solving skills that prove valuable to readers. Each chapter begins with an introduction to a concept followed by a case study tying the concept into the real world and wraps up with an activity. These engaging activities featured throughout the text further its Do Geography approach. *Human Geography in Action* provides the opportunity to use GIS to investigate ethnic distributions and culture regions, track the AIDS epidemic over space and time, model interstate migration flows, simulate India's demographic future, add new baseball franchises, animate past urban growth and assess future growth areas.

The research efforts undertaken to support them are increasingly interdisciplinary, focusing on ecological, chemical, physical, as well as societal issues. *River Restoration: Political, Social and Economic Perspectives* provides a comprehensive overview of research in the field of river restoration in humanities and the social sciences. It illustrates how in the last thirty years or so such approaches have evolved and strengthened within the restoration sciences. The scientific community working in this domain has structured itself often regionally and circumstantially to critically assess and improve restoration policies and practices. As a research field, river restoration tackles three thematic axes: Human river interactions, especially perceptions and practices of rivers and how these interactions can be changed by restoration projects; Political processes with a particular interest in governance and decision making and a specific emphasis on the question of public participation in restoration projects; Evaluation of the social and economic benefits of river restoration. *River Restoration: Political, Social and Economic Perspectives* encompasses these three topics and more to provide the reader with the most up to date and holistic view of this constantly evolving area. The book will be of particular interest to human and social scientists, biophysical scientists, hydrologists, geomorphologists, ecologists, environmental scientists, public policy makers, design or planning officers and anyone working in the field of river restoration. **Forthcoming Books** Rose Arny, 2003-04 **Children's Books in Print, 2007**, 2006 *The University of Chicago Magazine*, 1998 **The Software Encyclopedia**, 1986 **Catalog of Copyright Entries.
