Machine Design ,1961 *The London Gazette* ,1916 *Phenomenological Neuropsychiatry* Aaron L. Mishara,Marcin Moskalewicz,Michael A. Schwartz,Alexander Kranjec,2024-06-30 This innovative book offers a multidimensional exploration of the epistemological foundations of psychiatry and its major disorders By emphasizing the importance of phenomenology in unravelling the intricate interplay between basic categories of human experience and neurobiological processes it advocates

for a shift in both psychiatric research and clinical practice Phenomenological Neuropsychiatry presents psychiatry as a hybrid discipline that synthesizes subjective mental experiences with objective neuroscientific findings and forms an integrative and interdisciplinary structure that provides a dialectical bridge between understanding compassion and explanation The first section of the book presents the lived experience of psychosis and argues for a more inclusive approach to mental health issues The second section examines the ways in which psychiatric knowledge is constructed and the unique challenges posed by combining understanding and explanation of mental disorders Section three sheds light on how disruptions in bodily experiences memory processes and self perception can contribute to the development and manifestation of psychiatric issues The following section discusses disorders of mood and anxiety including the phenomena of depression obsessions and depersonalization The fifth and final section provides an in depth examination of psychotic disorders It covers a range of topics such as timing intentionality self monitoring of action in schizophrenia and the neurobiology of prodromal psychosis As a singular work dedicated to revitalizing and advancing cross fertilization between psychiatry and phenomenology this groundbreaking book clears the foggy operationalized clusters of mental symptoms that may obscure diagnosis and treatment and argues for systematic integration of patient subjectivity and collaboration in clinical research It features an authorship of the leading clinicians and thinkers from throughout the world in psychiatry psychology neuroscience social sciences and philosophy Phenomenological Neuropsychiatry How Patient Experience Bridges the Clinic with Clinical Neuroscience is a major contribution to the clinical literature and a must read for psychiatrists neurologists psychologists and professionals and students from other disciplines concerned with absorbing a deeper understanding of psychiatric disorders

Liability and Environment Lucas Bergkamp, 2021-12-06 Liability and Environment analyzes the role of law in particular civil liability in controlling environmental pollution and risk In modern environmental policy liability has become a popular instrument In this book Prof Bergkamp takes a fresh look at civil liability for environmental harm in an inter and transnational context Over the last decade industry s liability exposure for environmental harm has expanded significantly At the international EC and national level proposals for onerous strict environmental liability regimes are pending The polluter pays principle which is an articulation of the cost internalization theory in the environmental area is believed to justify such liability regimes Applying an instrumental approach to legal instruments Prof Bergkamp aims to redefine the role of liability in the heavily regulated environmental area He shows that liability for environmental harm is not justified by the polluter pays principle is an uncertain and unreliable instrument for achieving prevention results in an inefficient insurance scheme and plays a dubious role in adjusting activity levels Based on an analysis of the basic characteristics of alternative legal instruments Prof Bergkamp concludes that civil liability should play a more modest limited role in an environmental law system dominated by public law Where deterrence is not the objective first party insurance compensation funds or other public law regimes should be preferred over liability rules In addition to civil liability of private

parties Liability and Environment discusses State liability under international EC and national law Under international law breach of a primary obligation triggers a State s liability Prof Bergkamp argues that this rule should be applied also to liability of private parties In the environmental area a business primary obligations are spelled out in detailed permit conditions regulations and statutes According to Prof Bergkamp only if a primary obligation is breached a private person should be liable for environmental harm The system that Bergkamp advocates is an objective fault liability regime in which public environmental law defines the standard of care for both government and industry In rebuilding our civil liability system we should keep in mind that what is good for industry should be good for everyone or it is not good for anyone we should keep in mind that what is good for private parties should be good for the state or it is not good for either In rebuilding our civil liability system the international law of State responsibility which is unpolluted by risk spreading and activity level considerations will guide us a long way This book is aimed at advanced law students academic scholars and practitioners In addition it will be of interest to policy and legislative analysts legislators and government officials Professor Bergkamp s book cannot be described as solving the problems of legal and regulatory control of environmental harm whether within a nation or internationally As suggested before however the very idea of a solution is illusory All legal and regulatory regimes around the world are today and will remain for the future in a state of perpetually continuing development The virtue of this fine book is that it moves the process of that development forward by a very substantial measure from the Foreword by George L Priest
