Model 44758 Remote Sensor  
Owners Manual

Your Model 44658/44665 thermostat can read the temperature from up to three weather-resistant sensors at a distance of up to 75 feet.

**Notes:** Distances may vary based on building construction or other interfering frequencies.

You can control the temperature from one indoor sensor and/or thermostat, with the second and third being a sensor only. If you use multiple sensors, you might want to write a number on the back of each sensor. The remote sensors are designed to either be mounted on a wall, or set on a desk or side table.

Consult the Thermostat Instruction Manual for instructions in setting the thermostat to accommodate the remote sensor.
