Houghton Mifflin Math Central: Student text, 1998 **Houghton Mifflin Math Central** Laurie Boswell, Patsy F. Kanter, 1999 *Number Sense Routines* Jessica Shumway, 2023-10-10 Following up her best selling book *Number Sense Routines Building Numerical Literacy Every Day in Grades K-3* Jessica Shumway turns her focus to upper elementary classrooms *Number Sense Routines Developing Mathematical Understanding Every Day in Grades 3-5* is about tapping into every child's innate number sense and providing daily connected experiences that are responsive to children's learning needs *Consistent Daily Routines Work* Adaptable to any curriculum Shumway's 5, 10, or 15 minute warm up routines are an easy and effective way to build and solidify students' number sense foundations as a supplement to any program *Planning and Facilitating Your Classroom* No matter how familiar the routine Shumway provides insight on how to keep daily warm ups fresh She reveals careful thinking and planning that goes into each routine and offers detailed vignettes and dialogues of how they unfold in real classrooms *Assessment Strategies* As students engage in the process each routine becomes an exciting opportunity to gain insight into where they are in their understanding and help students articulate their mathematical thinking *Identify Big Ideas* Not only will these math routines help develop students' mathematical understanding as they move towards using standard algorithms but teachers will learn to better recognize the big ideas that emerge in discussions how to encourage important strategies based in number sense and how to facilitate conversations on key mathematical concepts These routines may appear in other places but I have never seen them written in such detail and with so many variations Although she makes what she does sound easy we all know that teaching math well is anything but easy It is challenging and complex *Unpacking what students are saying* helping them make connections not only to the math but to each other's ideas while simultaneously recording their ideas using mathematical models, visuals, or equations is no easy task Jessica provides wonderful visuals, examples of student work, and so much more to help educators develop the tools they need to improve their practice and in so doing improve student learning From the Foreword by math coach and consultant Lucy West **The Well-Trained Mind** Susan Wise Bauer, Jessie Wise, 2016-08-09 Is your child getting lost in the system becoming bored, losing his or her natural eagerness to learn? If so, it may be time to take charge of your child's education by doing it yourself *The Well-Trained Mind* will instruct you step by step on how to give your child an academically rigorous, comprehensive education from preschool through high school, one that will train him or her to read, to think, to understand, to be well-rounded, and curious about learning Veteran home educators Susan Wise Bauer and Jessie Wise outline the classical pattern of education called the trivium, which organizes learning around the maturing capacity of the child's mind and comprises three stages: the elementary school grammar stage when the building blocks of information are absorbed through memorization and rules; the middle school logic stage in which the student begins to think more analytically; and the high school rhetoric stage where the student learns to write and speak with force and originality Using this theory as your model

you'll be able to instruct your child whether full time or as a supplement to classroom education in all levels of reading writing history geography mathematics science foreign languages rhetoric logic art and music regardless of your own aptitude in those subjects Thousands of parents and teachers have already used the detailed book lists and methods described in *The Well Trained Mind* to create a truly superior education for the children in their care This extensively revised fourth edition contains completely updated curricula and book lists links to an entirely new set of online resources new material on teaching children with learning challenges cutting edge math and sciences recommendations answers to common questions about home education and advice on practical matters such as standardized testing working with your local school board designing a high school program preparing transcripts and applying to colleges You do have control over what and how your child learns *The Well Trained Mind* will give you the tools you'll need to teach your child with confidence and success
