Navigating Through Problem Solving and Reasoning in Grade 5, 2007. Problem solving and reasoning are students' processes of actively applying what they know to new problems from diverse areas of mathematics. Knowing a variety of mathematical ideas is insufficient unless students can draw on, integrate, and use them to solve challenging, complex problems. The Navigating through Problem Solving and Reasoning books for grades 3-6 present hands-on investigations that nurture

reasoning and problem solving strategies in each of the upper elementary grades In investigations for grade 5 children reason about place value and divisibility by making a PIN for a security system explore rates of change by projecting sales at a new pet shop and determine the best month for a ski trip by analysing snowfall data Students apply mathematical ideas from the five main content areas number algebra geometry measurement and data analysis As they work they infer generalise reason by analogy recognise relationships and make representations and they also predict check and revise and verify their results The Navigations series translates Principles and Standards for School Mathematics into action Each book includes practical teacher tested activities and a supplemental CD ROM that features applets for students use and resources for teachers professional development
