**Mathematics for Healthcare** Krasimira Tsaneva-Atanasova, Vanessa Diaz-Zuccarini, 2018-09-28 In 1996 and with extraordinary prescience Panfilov and Holden had highlighted in their seminal book *Computational Biology of the Heart* that biology was potentially the most mathematical of all sciences Fast forward 20 years and we have seen an explosion of applications of mathematics in not only biology but healthcare that has already produced significant breakthroughs not imaginable more than 20 years ago Great strides have been made in explaining through quantitative methods the underlying mechanisms of human disease not without considerable ingenuity and effort Biological mechanisms are bewildering complex ever evolving multi scale variable difficult to fully access and understand This poses immense challenges to the computational physiology community that nevertheless has developed an impressive arsenal of tools and methods in a vertiginous race to combat disease with the tall order of improving human healthcare Mechanistic models are now contending with the advent of machine learning in healthcare and the hope is that both approaches will be used synergistically since the complexity of human pathophysiology and the difficulty of acquiring human datasets will require both deductive and inductive methods This Research Topic presents work that is currently at the frontier in computational physiology with a striking range of applications from diabetes to graft failure and using a multitude of mathematical tools This collection of articles represents a snapshot in a field that is moving a dizzying speed bringing understanding of fundamental mechanism and solutions to healthcare problems experienced by healthcare systems all over the world

**Green Building, Environment, Energy and Civil Engineering** Jimmy Kao, Wen-Pei Sung, 2016-11-30 This proceedings volume contains select Green Building Materials and Civil Engineering related papers from the 2016 International Conference on Green Building Materials and Civil Engineering GBMCE2016 which was held in Hong Kong P R China April 17 18 2016 This volume of proceedings aims to provide a platform for researchers engineers academics as well as industrial professionals from all over the world to present their research results and development activities in the fields of Energy Environment and Civil Engineering

Unconventional Tight Reservoir Simulation: Theory, Technology and Practice Qiquan Ran, 2020-08-14 This book systematically introduces readers to the simulation theory and techniques of multiple media for unconventional tight reservoirs It summarizes the macro microscopic heterogeneities the features of multiscale multiple media the characteristics of complex fluid properties the occurrence state of continental tight oil and gas reservoirs in China and the complex flow characteristics and coupled production mechanism under unconventional development patterns It also discusses the simulation theory of multiple media for unconventional tight oil and gas reservoirs mathematic model of flow through discontinuous multiple media geological modeling of discrete multiscale multiple media and the simulation of multiscale

multiphase flow regimes and multiple media In addition to the practical application of simulation and software for unconventional tight oil and gas it also explores the development trends and prospects of simulation technology The book is of interest to scientific researchers and technicians engaged in the development of oil and gas reservoirs and serves as a reference resource for advanced graduate students in fields related to petroleum *Unconventional Resources* Cenk Temizel,Cengiz Yegin,Jihoon Kim,Luigi Saputelli,Ole Torsæter,2025-02-27 The oil and gas sector is a vital player in the energy transition With their vast resource potential unconventional shale plays will be an essential part in enabling this change *Unconventional Resources* serves as a comprehensive reference covering the latest technologies methodologies and applications of unconventional shale resources in the oil and gas industry and their role in the evolution of the sector s energy transition This book Offers an overview of geophysics geology and reservoir characterization in unconventional resources Discusses drilling well stimulation and completion production engineering and artificial lift Covers reservoir management and surveillance recovery enhancement production forecasting and surface facilities and testing Details technical and technological advances including machine learning AI data analytics and Industry 4 0 Explores the latest methods workflows in performance analysis in unconventional plays Employs integrated and hybrid approaches to the energy transition The book provides surface and subsurface technical professionals in the oil and gas industry a thorough overview of unconvensionals along with the integrated hybrid applications that will enable them to stay current with the industry s transition *Production Technology for Deep Reservoirs* Yan Peng,Yishan Liu,Hongyan Qu,Feng Dong,Jiehao Wang,2024-11-28 Underground energy is important for the whole society development but conventional underground energy is becoming exhausted The energy for deep reservoirs usually 3500m for petroleum engineering 1000m for mining engineering is diverse including not limited shale gas oil tight gas oil hot dry rock geothermal reservoirs and coal gasification Although it has abundant reserves the energy production from deep reservoirs is difficult in stimulations because the geological conditions for those deep reservoirs are tougher than those for conventional reservoirs such as high in situ stress obvious heterogeneity in rock properties and complex natural fracture networks Meanwhile common technologies also have environmental impacts The development trend of production technology for deep reservoirs requires it to be environment friendly or decrease environmental impacts at least CO2 utilization may achieve this environmental aim In order to efficiently produce energy from deep reservoirs technological innovation is booming around North America Europe and Asia **Agricultural Engineering Index** ,1987 *Agricultural Engineering Index, 1981-1985* Carl W.
