An Age of Accountability John L. Rury, 2023-10-13 An Age of Accountability highlights the role of test based accountability as a policy framework in American education from 1970 to 2020 For more than half a century the quest to hold schools and educators accountable for academic achievement has relied almost exclusively on standardized assessment The theory of change embedded in almost all test based accountability programs held that assessment with stipulated consequences could lead to major improvements in schools This was accomplished politically by proclaiming lofty goals of attaining universal proficiency and closing achievement gaps which repeatedly failed to materialize But even after very clear disappointments no other policy framework has emerged to challenge its hegemony The American public today has little confidence in institutions to improve the quality of goods and services they provide especially in the public sector As a consequence many Americans continue to believe that accountability remains a vital necessity even if educators and policy scholars disagree *The Next Generation of Testing* Hong Jiao, Robert W. Lissitz, 2015-11-10 This book discusses the RTTP policy fostering new state tests aligned with common core standards assessing higher order thinking skills It covers the development scoring and validity of these tests highlighting challenges and the transition from old state tests to consortium tests like PARCC and SBAC **Fluent Python** Luciano Ramalho, 2015 Explains how to write idiomatic effective Python code by leveraging its best features Python s simplicity quickly lets you become productive with it but this often means you aren t using everything the language has to offer By taking you through Python s key language features and libraries this practical book shows you how to make your code shorter faster and more readable all at the same time From publisher description
