Effects of integrated learning: explicating a mathematical concept in inquiry-based science camps Louise Bindel, 2018 Although various arguments for integrated learning of mathematics and science exist empirical evidence that integrated learning is as beneficial as anticipated is limited Therefore this quasi experimental study investigates the effect of integrated learning of mathematics and science on eight student variables by comparing it to a control group Results show that integrated learning is no miracle cure but has positive and negative effects on specific student outcomes Whereas integrated learning effects students view of the relation between mathematics and science positively it effects students scientific self concept negatively Thus integrated learning should not substitute but rather complement disciplinary learning Obwohl zahlreiche Argumente für das integrierte Lernen von Mathematik und Naturwissenschaften existieren ist die vorteilhafte Wirkung integrierten Lernens begrenzt empirisch belegt Im Rahmen dieser quasi experimentellen Studie wird der Effekt integrierten Lernens auf acht Sch lervariablen durch Vergleiche mit einer Kontrollgruppe untersucht Die Ergebnisse zeigen dass integriertes Lernen kein

Fluency and Reading Comprehension in Typical Readers and Dyslexics Readers Simone A. Capellini, Giseli D. Germano, 2018-02-22 Reading involves decoding and comprehension components and to become efficient it requires a large number of cognitive and linguistic processes Among those the phonological awareness the alphabetic principle the decoding the fluency the lexical development and the text comprehension development The reading comprehension is strongly related with the development of vocabulary oral language linguistic skills memory skills and ability to make inferences and the world experiences of each individual These processes become important only when the professional needs to deal with students presenting difficulties in learning how to read The difficulty using the knowledge of conversion rules between grapheme and phoneme to the word reading construction characterizes the dyslexia which is a specific learning disorder with a neurological source These difficulties presented by students with dyslexia interfere in their learning process impairing the learning development Knowing and following the reading development and its processes as well as obtaining the punctuation of fluency abilities and students comprehension allow us to understand what happens when the student presents difficulties to read This could help in the identification of learning disabilities and in the development of intervention programs
