,1992-10      **Iran's Experiment with Parliamentary Governance** Mangol Bayat,2020-08-17 For the past several decades  
scholars have studied and written about the Iranian constitutional revolution with the 1979 Islamic Revolution as a subtext  
obscuring the secularist trend that characterized its very nature Constitutionalist leaders represented a diverse composite of  
beliefs yet they all shared a similar vision of a new Iran one that included far reaching modernizing reforms and concepts  
rooted in the European Enlightenment The second national assembly majles during its brief two year term aspired to  
legislate these reforms in one of the most important experiments in parliamentary governance Mangol Bayat provides a much  
needed detailed analysis of this historic episode examining the national and international actors and the political climate that  
engendered one crisis after another ultimately leading to its fateful end Bayat highlights the radical transformation of old  
institutions and the innovation of new ones and most importantly shows how this term provided a reasonably successful  
model of parliament imposing its will on the executive power that was primarily composed of old guard elite leaders At the  
same time Bayat challenges the traditional perception among scholars that reform attempts failed due to sectarian politics  
and ideological differences      The New York Times Index ,2005
