[IT Essentials \(ITE v6.0 + v7.0\) Chapter 13 Exam Answers 100%](#)

1. Which two items are used in asymmetric encryption? (Choose two.)

- a token
- a DES key
- **a private key ***
- **a public key ***
- a TPM

Explanation: A token is something that is used to provide two-factor authentication. DES is using an identical key to encrypt and decrypt. Asymmetric encryption uses a private key associated with a public key.

2. Which two algorithms are used for hash encoding to guarantee the integrity of data? (Choose two.)

- **MDS ***
- chap checksum
- **SHA ***
- VPN
- SSL

3. A high technology company has an issue with unauthorized people gaining access into the company by following an authorized employee through the secure entrance. Which two measures could help with this security breach? (Choose two.)

- biometrics
- employee smart ID
- **mantrap ***
- multifactor authentication
- **security guard that checks IDs ***

Explanation: A guard checking IDs or a mantrap can help prevent someone following a legitimate employee into a restricted area. With biometrics, employee smart IDs, or multifactor authentication being used, once the door is accessed by someone having the correct credentials, unauthorized people could still trail the legitimate person into the building or area.

4. A user receives a phone call from a person who claims to represent IT services and then asks that user for confirmation of username and password for auditing purposes. Which security threat does this phone call represent?

- DDoS
- spam
- **social engineering ***
- anonymous keylogging

Explanation: Social engineering attempts to gain the confidence of an employee and convince that person to divulge confidential and sensitive information, such as usernames and passwords. DDoS attacks, spam, and keylogging are all examples of software based security threats, not social engineering.
