common finding that family physicians felt unprepared despite frequently seeing these types of complaints Since the primary care physician operates in a different environment than an orthopedic surgeon the approach to the patient presenting in the primary care clinic must also differ from the specialist s approach This book has been divided into chapters covering major body regions and injuries and each chapter includes Red flags which are conditions requiring immediate treatment and referral basic anatomy of the body region Clinical evaluation techniques and tear sheets for use during examination Common clinical diagnoses and disposition of the patient illustrated with helpful flow charts *Assessment and Management* Jeanne L.
