PRACTICAL Project Management: Manage Projects Successfully with this Comprehensive Toolkit and Templates

Emanuela Giangregorio, 2020-09-12 Project Management is fast becoming one of the most sought after skills across industries and job functions. Many professionals are attracted to project management as a career choice. Knowing how to implement a tried and tested approach that complements all popular methodologies such as PRINCE2, Agile and the PMI's PMBOK is essential for all project managers. Based on Emanuela's internationally best-selling course Practical Project Management, this book condenses best practice project management methods into a practical and useful guide. Learn from her real world experience and get started on your projects with a comprehensive set of tools and templates covering the entire project life cycle. Armed with the benefits of the various methods and tools, you should be able to convince colleagues of their importance to deliver projects successfully. If you aim to complete a project qualification such as PRINCE2 or the PMI's PMP, this book is highly recommended as pre-reading to first understand all key project management concepts and their practical implementation. This book introduces you to the concept of project management and walks you through the full project life cycle. It follows a logical thinking approach and provides worked examples. If you follow Emanuela's teaching in this book, you will be equipped to deliver projects more confidently, professionally and successfully. You will learn how to adapt the approach to different types of projects in terms of their nature and complexity. Templates in this book include a Project Brief, Project Business Case, Project Plan, Governance Structure, Responsibility Matrix, Risks Management Log, Stakeholder Mapping, Project Communication Plan, Project Actions Tracker and Gantt Chart, Task Dependency Mapping, Budget Breakdown and Tracker, Kick Off Meeting Agenda, Scope Change Management Log, Issues Management Log, Status Report, Benefits Realisation Review, Lesson Learnt Log, Project Manager Skills Self Assessment. EMANUELA is a performance improvement consultant with over 20 years experience in project management. She has trained over 5,000 people on the subject around the world and understands how to explain complex topics simply. Whether training in person or virtually, she engages individuals and teams with energy, enthusiasm and passion for continuous improvement. Emanuela's books are all practical, relevant and useful.

Best Practices in Project Management David M. Rose,2003 The Arizona Department of Transportation s ADOT s ability to manage a cost effective construction program delivery and be accountable to policy makers and customers regarding the cost and timeliness of highway projects is at risk The following is ADOT s current situation There is little consistency in project management ADOT is not actively managing and controlling budget and scope The organization does not hold itself and managers accountable for scope budget and quality ADOT s process tools and procedures do not enable the most effective use of human and other resources and There will be continued impacts to ADOT s organizational capacity and health The following are the desired outcomes from improving ADOT s project management process a ADOT will be able to manage construction program delivery against scope schedule budget and quality objectives on a department wide basis at the program and project levels b ADOT will hold itself accountable for delivering the program vs scope schedule budget and quality objectives c The strategic importance of project management will be emphasized by ADOT management d ADOT will increase its project focus to establish a project management culture e

The importance and role of project managers and the project management discipline will be elevated. A consistent process at the project level will be established. In this way more discipline and predictability will be brought to the process. This will strengthen ADOT's ability to manage overall program delivery and g Scopes will be set and budgets managed at the project level. The role and authority of project managers will be strengthened to accomplish these objectives. The decision making will be proactive recognizing that in project delivery scope schedule and budget decisions impact each other.
