**AP - Environmental Science - Teacher's Edition** Tracey Greenwood, Lissa Bainbridge Smith, Kent Pryor, Richard Allan, 2020 BIOZONE's new AP Environmental Science is a dedicated title to address the new APES CED. This title takes a global perspective examining the very latest issues concerning the environment while still providing the foundation for students to understand and engage with the science involved. Current concerns in the global community including wildfires, COVID-19, glacial retreat, and loss of biodiversity are examined with the emphasis being on the interconnectedness of Earth's systems and the importance of ecosystem services. Using current case studies, student investigations, and data analysis, BIOZONE's AP Environmental Science emphasizes the application of knowledge to understanding the Earth's systems and identifying and analyzing environmental problems and their solutions. This easily navigated resource addresses the two essential components of the course framework: science practices and course content. Its interdisciplinary approach and highly visual format encourage students to engage fully with the principles, ideas, and methodologies required to understand the natural world. The Teacher's Edition is a version of the student book with additional features specifically designed to aid the teacher's implementation of the CED. These features include suggested answers in place to all activities not requiring the student's own investigation, a preface chapter providing a guide to instructional strategies and use of the book's features including use in a differentiated classroom, a tabulated guide to what environmental legislation is covered in the book and where, strategies for student approaches to environmental solutions, a guide to the features of the Teacher's Digital Edition, long answers to some research questions, and group work at the back of the book.
