

Question 4

Read the passage given below and answer the questions (a), (b) and (c) that follow:

- (1) Inside the cockpit of the World War II Mosquito plane, I could make out, against the light of the moon, the muffled head of its pilot and the twin circles of his goggles as he looked out of the side window towards me. Carefully he raised his right hand till I could see it in the window, fingers straight, **palm** downwards. He jabbed the fingers forward and down, meaning that we were going to descend and that I should follow him. 5
- (2) I nodded and quickly brought up my own left hand so he could see it, first pointing forwards to my own control panel with one forefinger, and then holding up my five spread fingers. Finally I drew my hand across my throat. By common agreement this sign meant that I had only five minutes fuel left, and then my engine would cut out. I saw the muffled, goggled, oxygen-masked head nod in understanding, and then we were heading downwards towards the sheet of fog. 10
- (3) My plane stopped trembling and plunged ahead of the Mosquito. I pulled back on the throttle, hearing the engine die to a low whistle, and the other pilot was back beside me. We were diving straight towards the shrouded **land**. I glanced at my altimeter: two thousand feet, still diving. 15
- (4) He pulled out at three hundred feet. The fog was still below us. Probably the fog bank was only from the ground to two hundred feet up, but that was more than enough to prevent a plane from landing without guidance. I could imagine the **stream** of instructions coming from the radar hut into the earphones of the man flying beside me, eighty feet away. I kept my eyes on him, following as closely as possible, afraid of losing sight for an instant, watching for his every hand-signal. Two minutes later he held up his clenched left fist in the window, then opened the fist to splay all five fingers against the glass, indicating that I should lower the undercarriage. I moved the lever downwards and felt the dull thunk as all three wheels went down, happily powered by hydraulic pressure and not dependent on the failed electrical system. 20 25
- (5) The pilot of the shepherd aircraft pointed down again, for another descent. I managed to flick a glance at my fuel gauge: it was on zero, flickering feebly. For God's sake, hurry up, I prayed, for if my fuel failed me now there would be no time to climb to the minimum five hundred feet needed for bailing out. A jet fighter at one hundred feet without an engine is a death-trap with no chances for survival. 30 35
