Grade 4 Ana Test Math:

Improving Primary Mathematics Education, Teaching and Learning Mellony Graven, Hamsa Venkat, 2017-01-19

This book focuses on how to improve the teaching and learning of primary level mathematics education within resource constrained contexts. It builds on two large numeracy projects within South Africa which speak to broader global concerns and highlight how research and development not only enables one to meet ethical imperatives but also explore how further interventions can be developed. Teacher and research communities must work together to create mutually beneficial relationships and establish a cohesive understanding of the requirements of primary mathematics education.

Plurilingualism in Teaching and Learning Julie Choi, Sue Ollerhead, 2018-01-09. Assembling a rich and diverse range of research studies on the role of plurilingualism across a wide variety of teaching and learning settings, this book supports teacher reflection and action in practical ways and illustrates how researchers tease out and analyze the complex realities of their educational environments. With a focus on education policies, teaching practices, training and resourcing, this volume addresses a range of mainstream and specialized contexts and examines the position of learners and teachers as users of plurilingual repertoires. Providing a close look into the possibilities and constraints of plurilingual education, this book helps researchers and educators clarify and strengthen their understandings of the links between language and literacy and offers them new ways to think more rigorously and critically about the language ideologies that shape their own beliefs and approaches in language teaching and learning.
