**College Algebra** Raymond A. Barnett, Michael R. Ziegler, Karl E. Byleen, 1998. Emphasizing computation, skills, ideas, and problem solving rather than mathematical theory, this text omits most derivations and proofs except where significant. Each concept is illustrated with an example followed by a parallel problem and solution. Over 4200 graded problems are included. **Principles of Feedback Control** Charles H. Wilts, 1960 *Algebra and Trigonometry* Michael Sullivan, Michael Sullivan (III), 1998. The goal of this book is to provide a solid mathematical foundation via visualization of real-world data. This book uses technology as a tool to solve problems, motivate concepts, explore, and preview mathematical concepts, and to find curves of best fit to the data. Most mathematical concepts are developed and illustrated both

algebraically and graphically with the more intuitive and appropriate method presented first The authors use their extensive teaching and writing experiences to guide and support readers through the typical difficult areas College Algebra Michael Sullivan,1998 This series incorporates high end usage of the graphing calculator through the real world data sets and modeling Using a 4 color design pedagogically and developing concepts through objectives and applications makes the text even more accessible to both students and instructors
