Patterns

Student Name: Kayla Taylor

Grade Level: Prep (5s)

Date of Lesson: Sept. 17-21, 2018

Guiding and/or Essential Questions:

What is a pattern?

How do patterns help us determine what comes next?

Pre-lesson Assignments and/or Student Prior Knowledge

Students have shown interest in exploring patterns during playtime, such as making a pattern with the math cubes, writing their name in a pattern, and making patterns with the shape manipulatives. Additionally, students were introduced to patterns in a whole group setting during morning meeting. Our "How many days in school?" board has led to an AB pattern and students pointed it out and identified what color should be selected the next day.

Standards (NJ Preschool Teaching and Learning Standards 2014):

4.3.1 Sort, order, pattern, and classify objects by non-measurable (e.g., color, texture, type of material) and measurable attributes (e.g., length, capacity, height).

Learning Objectives	Assessment
Students will create cube trains of exactly 8 cubes arranged in a pattern.	Teacher will assess each student's cube train, looking for it to be exactly 8 cubes long and arranged in a pattern. Teacher will record observations.
Students will compare repeating arrangements (patterns) and non-repeating arrangements.	Teacher will assess for understanding that patterns are repeating in a specific order and record student responses during the sorting activity.

Materials/Resources:

Math cubes, sorting hoops

Resource for lesson idea: *Investigations in Number, Data, and Space: Kindergarten* a Pearson Curriculum Guide

Plan for set-up/distribution/cleanup of materials:

Teacher will prepare materials before pulling students to the activity. Students will take apart their cube trains and return them to the bucket before leaving the small group activity.

Step by Step plan:

1. Lesson Beginning (Discussion/Observations):
 1. First, I will tell the students that we are going to start investigating different ways to sort and arrange items.
 2. I will show them a cube train that has no repeating arrangement and ask them to share their observations about it.
 3. Then, I will show them a cube train with a repeating arrangement and ask them to share their observations.
 4. Lastly, I will put the cube trains next to each other and ask the students to share what they notice is the same or different about them.

Teaching Students to Think Like Scientists Maria C. Grant, Douglas Fisher, 2013-12-11 It is essential that students learn to examine, review, and evaluate knowledge and ideas through a process of scientific investigation and argumentation. Using these instructional methods and lesson scenarios, teachers of all disciplines will gain the tools needed to offer students a richer, lasting understanding of science, its concepts, and its place in their lives and the global community. [Lesson Plans for the Elementary PE Teacher](#)

Michael E. Gosset, 2018-07-24 This new book provides PE teachers with practical lesson plans for teaching movement at every elementary grade level. The book's movement and skill theme-based approach, which differs from the typical activity-based approaches found in many schools, helps students develop overall health and well-being regardless of sports interests and hobbies. Each lesson plan is broken down into subsections to illustrate the physical, cognitive, and affective benefits the central theme or concept to be explored, the grade level, and the equipment needed. By sequencing these lesson plans so that students develop general body awareness and coordination before finer motor skills like throwing and catching, the author offers a model of PE instruction that will promote healthy lifestyle choices long after graduation.

Physical Education Methods for Elementary Teachers Katherine T. Thomas, Amelia M. Lee, Jerry R. Thomas, 2008 The authors show non-specialists how to develop a realistic and workable approach to teaching physical education. The book makes physical education worthwhile, practical, and fun for students and teachers. The text provides the reader with a basic physical education curriculum and suggestions for how to implement this.
