□□□□□□ Tao-chung Yao, 2005 [Integrating Chinese Linguistic Research and Language Teaching and Learning](#) Hongyin Tao, 2016-10-03 Linguistic research and language teaching have generally been viewed as two separate types of academic endeavor While linguists have been preoccupied with pattern finding and theory building language teachers often encounter issues that are not readily addressed by theoretical linguistic research This collection with eleven papers touching upon a wide range of issues stands out as one of the rare concerted efforts toward a meaningful integration of the two endeavors Subject matters include tone stress word structure grammatical categories e g classifiers syntactic structures including argument structure discourse particles implicit and explicit knowledge conversational repair and learner corpus With a diverse range of theoretical orientations this collection serves to showcase some of the productive ways to create synergy between Chinese linguistic research and language education

Teaching and Learning Chinese as a Second or Foreign Language Ko-Yin Sung, 2019-10-23 *Teaching and Learning Chinese as a Second or Foreign Language* edited by Ko Yin Sung addresses three emerging themes in the field of Chinese language teaching and learning 1 Increasingly ubiquitous in all language learning and teaching and for the learning of Chinese as a second language in particular information and communication technology ICT can serve as an important and effective tool Several chapters focus on how certain emerging ICT tools are applied in teaching and learning Chinese as a second language 2 Due to China's economic and political influence the number of students of all ages studying Chinese as a second language but especially young learners has increased in many parts of the world Despite this the research into teaching Chinese to young learners has lagged behind Several chapters investigate young learners motivations and effective methods for assisting them to master the Chinese language 3 The writing system of the Chinese language poses many challenges for learners especially those more familiar with alphabetical languages In light of this difficulty in learning Chinese characters some of the chapters identify effective teaching and learning strategies to master the Chinese language
