Literary Publishing in the Twenty-First Century Travis Kurowski, Wayne Miller, Kevin Prufer, 2016-04-12 A primer on big and small presses literary magazines and all things digital diversity and economics lively timely and indispensable Rob Spillman editor and co founder of Tin House Gutenberg s invention of movable type in the fifteenth century introduced an era of mass communication that permanently altered the structure of society While publishing has been buffeted by persistent upheaval and transformation ever since the current combination of technological developments market pressures and changing reading habits has led to an unprecedented paradigm shift in the world of books Bringing together a wide range of perspectives industry veterans and provocateurs writers editors and digital mavericks this invaluable collection reflects on the current situation of literary publishing and provides a road map for the shifting geography of its future How do editors and publishers adapt to this rapidly changing world How are vibrant public communities in the Digital Age created and engaged How can an industry traditionally dominated by white men become more diverse and inclusive Mindful of the stakes of the ongoing transformation Literary Publishing in the 21st Century goes beyond the usual discussion of print vs digital to uncover the complex contradictory and increasingly vibrant personalities that will define the future of the book Any reader or writer who needs to know about the present and future of literature in our time should consult this collection It is opinionated lively and instructive Bill Henderson founder and editor of Pushcart Press

Declarative Logic Programming Michael Kifer, Yanhong Annie Liu, 2018-09-19 The idea of this book grew out of a symposium that was held at Stony Brook in September 2012 in celebration of David S Warren s fundamental contributions to Computer Science and the area of Logic Programming in particular Logic Programming LP is at the nexus of Knowledge Representation Artificial Intelligence Mathematical Logic Databases and Programming Languages It is fascinating and intellectually stimulating due to the fundamental interplay among theory systems and applications brought about by logic Logic programs are more declarative in the sense that they strive to be logical specifications of what to do rather than how to do it and thus they are high level and easier to understand and maintain Yet without being given an actual algorithm LP systems implement the logical specifications automatically Several books cover the basics of LP but focus mostly on the Prolog language with its incomplete control strategy and non logical features At the same time there is generally a lack of accessible yet comprehensive collections of articles covering the key aspects in declarative LP These aspects include among others well founded vs stable model semantics for negation constraints object oriented LP updates probabilistic LP and evaluation methods including top down vs bottom up and tabling For systems the situation is even less satisfactory lacking accessible literature that can help train the new crop of developers practitioners and researchers There are a few guides on Warren s Abstract Machine WAM which underlies most implementations of Prolog but very little exists on what is needed for constructing a state of the art declarative LP inference engine Contrast this with the literature on say Compilers where one can first study a book on the

general principles and algorithms and then dive in the particulars of a specific compiler Such resources greatly facilitate the ability to start making meaningful contributions quickly There is also a dearth of articles about systems that support truly declarative languages especially those that tie into first order logic mathematical programming and constraint solving LP helps solve challenging problems in a wide range of application areas but in depth analysis of their connection with LP language abstractions and LP implementation methods is lacking Also rare are surveys of challenging application areas of LP such as Bioinformatics Natural Language Processing Verification and Planning The goal of this book is to help fill in the previously mentioned void in the LP literature It offers a number of overviews on key aspects of LP that are suitable for researchers and practitioners as well as graduate students The following chapters in theory systems and applications of LP are included

**The Professional Standards of Executive Remuneration Consultants** Calvin Jackson, 2023-05-01 Love them or hate them executive remuneration consultants are key players in remuneration committees pay determination processes This book concerns the professional standards of executive remuneration consultants and their in house counterparts for example Human Resources Director and Head of Reward in providing remuneration committee advisory services The author is a 25 year veteran executive remuneration consultant having worked around the world in this capacity particularly in the financial services sector This book is based on a qualitative empirical doctoral research exercise involving 53 participants in the UK executive pay scene including regulators institutional shareholder bodies proxy advisors remuneration committees chairs members executive remuneration consultants and in house executive reward specialists The objective was to formulate conclusions that could be used to the benefit of UK practice and contribute to the relevant academic scholarship on executive remuneration consultants The research covered 18 aspects ranging from an examination of the independence of such consultants to whether there might be a specialised accreditation qualification and or licence to practise regime covering their services It provides novel insights into this previously under researched area of corporate governance financial regulation This book will be of interest to those involved in the UK executive remuneration scene whether government regulators or any of the other parties mentioned already plus academics in universities and business schools It is hoped too that overseas remuneration regimes that have respects in common with the UK s will find this book useful

**Public Discourses and Attitudes in Greece during the Crisis** Dimitris Katsikas, 2019-11-21 This book presents the findings of new empirical research regarding shifts in public discourses and attitudes in Greek society as a result of the crisis These findings have shown different shades of Euroscepticism and anti German sentiments but they have also revealed a normative conflict within Greek society itself The book shows how economic crises and strict policy conditionality causing or deepening economic recession in the countries receiving it has the potential to set in motion a fragmentation process which transcends standard material stratification and relates to broader political and even cultural rifts among the population With this the book serves as a case study of the impact of wider pressures and shifts weighing upon the European

Union EU and the way European societies perceive the integration process This text will be of key interest to scholars and students of EU politics Greek and Southern European studies and more broadly to cultural and comparative politics and political economy and European politics
