### *Abstract*

*By standards of economic efficiency which you will elaborate, what is wrong with inflation? What is wrong with unemployment? What is the inter-relationship between inflation and unemployment? Is there any important short-run versus long-run distinction here? What can national economic policy do to solve these problems? Is the effect of such policy sustainable? At each state of the argument, show what costs are associated with what benefits.*

## Macroeconomic Notes Review:

**Reintroducing Macroeconomics** Steven Mark Cohn, 2015-01-28 This lively introduction to heterodox economics provides a balanced critique of the standard introductory macroeconomic curriculum. In clear and accessible prose it explains many of the key principles that underlie a variety of alternative theoretical perspectives including institutionalist economics, radical economics, Post Keynesian economics, feminist economics, ecological economics, Marxist economics, social economics, and socioeconomics. Because the book's structure parallels the chapters and subject matter presented in a typical introductory macroeconomics textbook, *Reintroducing Macroeconomics* provides readers with a running commentary on the standard approach while simultaneously introducing them to a broader range of ideas about the causes and appropriate policy responses to a wide range of common economic problems. Although designed primarily as a companion volume for students in introductory economics courses, the book can also be used effectively for more targeted applications that highlight a particular economic issue or approach. It will be of particular interest to students in related disciplines such as American Studies, anthropology, black studies, environmental studies, gender studies, history, political science, and sociology who may be required to take introductory economics classes and who are interested in gaining an alternative perspective. By demonstrating the vitality and common ground underlying a broad spectrum of heterodox approaches, *Reintroducing Macroeconomics* brings alternative perspectives into the classroom in an accessible way that empowers students to think about the economy in new and exciting ways. The text includes end-of-chapter study questions as well as a detailed note to instructors.

*An Introduction to Macroeconomics* Louis-Philippe Rochon, Sergio Rossi, 2021-03-26 The second edition of this important textbook introduces students to the fundamental ideas of heterodox economics. It is written in a clear way by top heterodox scholars. This introductory book offers not only a critique of the dominant approach to economics but also presents a positive and constructive alternative. Students interested in an explanation of the real world will find the heterodox approach not only satisfying but ultimately better able to explain a money-using economy prone to periods of instability and crises.

**Post-Keynesian Macroeconomics** Mathew Forstater, Gary Mongiovi, Steven Pressman, 2007-02-01 Edited by three very well-known academics in the field and contributed to by John Smithin, Laurence Moss, and G. C. Harcourt, this volume reflects the breadth of the honoree's interests and as such it covers a wide range of topics including political economy, labour economics, history of economic thought, and macroeconomics.
