The Canadian Occupational Performance Measure (COPM) supports high-quality, client-centred, occupation-based practice. The COPM is an individualized performance measure designed to detect change in a client's self-perception of occupational performance over time. The COPM is intended for use as an outcome measure. As such, it should be administered at the beginning of care to establish baseline performance goals, and again at an appropriate interval thereafter to determine progress and outcome.

**The COPM is used to:**

- identify problem areas in self-perceived occupational performance;
- provide a rating of the client's priorities in occupational performance;
- evaluate performance and satisfaction relative to those problem areas;
- provide the basis for goal setting; and
- measure changes in a client's perception of his/her occupational performance over the course of occupational therapy interventions.
