

Although it is possible to pitch this tent alone, it is faster and easier with two people. Do not drop tent bag or pole bag on its end. Do not bounce tent bag on its end to get the tent out. These actions may cut the shock cord and/or damage the pole ends.

Component List: 1 Tent Body, 4 Poles, 1 Tent Fly, 1 Fly Rod, 2 Brim Rods, 1 Pole Bag, 1 Carry Bag, 1 Stake Bag w/ Stakes

ASSEMBLY

1. Lay the tent body out on the ground and open the door. In windy conditions, the windward corner of the tent should be staked down. Take all of the poles and rods out of the carry bag, assemble them, and divide according to their length.

IMPORTANT: To prevent damage the spider hull and roof cloth are color coded. Orient the spider such that the roof fabric is not twisted and the two spider arms, colored yellow, face the tent fabric insert at the tent's peak.

2. One end of each frame pole has a larger diameter. Insert this end into one of the arms of the spider. Make sure that it seats securely. Improper fit can cause the spider to break. See fig. 1.

3. Follow the seam from the spider, down to the corner of the tent. Make sure that the spider is properly oriented, then insert the pin on the corner ring into the other end of the pole. See fig. 2.

4. Insert the next pole onto the opposite arm on the spider. Tension this assembly by placing the corner pin in the other end of the pole. See fig. 2.

With the assembly on the ground, place a third pole into the spider and place the corner pin in the other end. Lift the spider and insert the last pole. Apply tension by inserting the corner pin into the end of the pole.

5. Connect all clips and rings to the frame. See fig. 3.

6. Lay the fly out on the ground, upside down. Thread the brim rods through the sleeves on the fly. Fit the fly rod into the web pockets on the underside of the fly and secure with the Velcro tabs at the center. See fig. 4.

7. Turn the fly right side up and drape it over the tent with a brim rod over each door. Wrap and secure the Velcro straps around the poles to keep the fly in place. Insert each end of a brim rod into the corresponding grommet on the tent. Set the heads to the same height. If the fly has inflated, adjust the Velcro straps on the frame. Flatten the side release buckles at all of the corners and tension until wrinkles are gone.

Fig. 4

8. Stake out the tent through the corner rings. Stake opposite corners while applying tension to square the tent and remove wrinkles from the floor. Stake out the fly through the rings on the side of the fly. Stake down the side pull outs to provide maximum floor space. See fig. 5.

NOTES

- General purpose stakes have been included, sand or snow may require a more substantial stake. Purchase these from your Eureka! dealer.
- When you roll down the windows, tuck the fabric into its pocket at the bottom.
- The two corner closet organizers are designed for clothes and small accessories.

We recommend:

During wind, the tent should be gored out by the storm rings on the fly. Tie ropes (not included) to the rings and stake them out about three feet from the tent. See fig. 5.

When taking the tent down, reverse steps, leave door open and roll toward door to allow air to escape.

To prevent condensation, keep the door and windows open. Open from the top in bad weather and from the bottom during fair weather.
