The national histories, written by a team of international researchers, complement the broader thematic studies in volume One.

**Transportation Asset Management**

Zongzhi Li, 2018-08-31. Transportation asset management delivers efficient and cost-effective investment decisions to support transportation infrastructure and system usage. Performance measured in economic, social, health, and environmental terms. It can be applied at national, state, and local levels. This distinctive book addresses asset management for multimodal transportation, taking account of system component interdependency, integration, and risk and uncertainty. It sets out rigorous quantitative and qualitative methods for addressing system goals, performance measures, and needs, data collection, and management performance modeling, project evaluation, selection, and trade-off analysis, innovative financing, and institutional issues. It applies as easily to static traffic and time-dependent or dynamic traffic, which exists on a more local level. It is written for transportation planners, engineers, and academia, as well as a growing number of graduate students taking transportation asset management courses.

Estimating Life Expectancies of Highway Assets, Volume 2: Final Report Paul David Thompson, Kevin Matthew Ford, 2012. TRB's National Cooperative Highway Research Program NCHRP Report 713. Estimating Life Expectancies of Highway Assets, Volume 2, Final Report describes the technical issues and data needs associated with estimating asset life expectancies and the practices used in a number of fields such as the energy and financial industries to make such estimates.
