Geometry, Grade 1 Andrea Miles Moran,Marcia E. Dana,1994

Marks First Lessons in Geometry Bernhard Marks,2015-06-25 Excerpt from Marks First Lessons in Geometry Objectively Two Parts How it ever came to pass that Arithmetic should be taught to the extent attained in the grammar schools of the civilized world while Geometry is almost wholly excluded from them is a problem for which the author of this little book has often sought a solution but with only this result viz that Arithmetic being considered an elementary branch is included in all systems of elementary instruction but Geometry being regarded as a higher branch is reserved for systems of advanced education and is on that account reached by but very few of the many who need it The error here is fundamental Instead of teaching the elements of all branches ice teach elementary branches much too exhaustively The elements of Geometry are much easier to learn and arc of more value when learned than advanced Arithmetic and if a boy is to leave school with merely a grammar school education he would be better prepared for the active duties of life with a little Arithmetic and some Geometry than with more Arithmetic and no Geometry About the Publisher
