Del Casino Jr.,Natalie Marie Gulsrud,Sarah Barns,2023-10-18 Artificial intelligence AI is now mediating and in some cases seen to be controlling key urban services and infrastructures thus becoming a prominent feature of the contemporary city As portrayed in recent studies the autonomous city can be understood as a city where urban artificial intelligences perform tasks and take on roles which have traditionally been the domain of humans At stake in these debates are questions related to the meaning and ongoing role of intelligence for both humans and machines While autonomous cars transport people service robots run shops drones deliver goods and city brains govern entire cities humans are redefining the meaning of what smart means in the city and what role the human being may play in future urban spaces With humans shifted to new sectors of the economy or pushed aside by algorithms and robotic agents creating new ways of seeing and governing the city we raise the question as to whether or not cities are becoming more autonomous from human experience in the sense that their operation does not rely as much on human inputs anymore **Tracks, Trails, and Thieves** Jack E. Deibert,Brent Henry Breithaupt,2016 Detailed recounting of the first government sponsored geological survey of the Wyoming and adjacent territories in 1868 The results of Hayden s survey provided the earliest descriptive stratigraphic structural profile across the Rocky Mountains and the initial discovery of dinosaur tracks in western North America *Australian Education Index* ,1988 Atlas géopolitique du Cambodge en Asie et dans le Monde ,2017 *Current Index to Journals in Education* ,1977 **Forthcoming Books** Rose Arny,1997
