Dangerous People Bernadette McSherry, Patrick Keyzer, 2011-11-28 Experienced legal academics and mental health professionals explore the current approaches to dangerousness and preventive detention. The defining characteristics of those deemed dangerous by society vary according to culture, place, and time, and the contributors to this text have gathered to analyze the policies and practices related to current outgroups such as sex offenders, suspected terrorists, and young offenders in the United States, Scotland, England, and Australia. *Dangerous People* is the result of their research, workshopping, and writing. The text is organized logically and begins with a section on Parameters that explores the international human rights and legal limitations related to preventive detention schemes. It moves on to Policy, where contributors examine legislative policy and Prediction or risk assessment, especially in terms of violent crimes in youth. The section on Practice focuses on recent schemes to prevent re-offending. This text is indispensable as a resource that deals with the practical issues surrounding preventive detention and supervision schemes, the assessment of the risk of future harm in offenders, and different programs and sentencing options for high-risk offenders with mental illnesses. It contains case examples that bring real-life issues to light and sets forth an agenda to provide effective ways to protect communities from harm. **Sexual**

Both broad and specific perspectives on the assessment of sexual offenders are provided. Overviews are offered of clinical and forensic evaluations of such offenders and the utility of structured psychological assessment. A novel conceptual model of risk assessment is proposed. More specifically, each of the primary approaches or instruments related to risk assessment of sexual offending are addressed: the Static Risk Assessment, measures the Sex Offender Risk Appraisal Guide, structured professional judgment, and the varied measures of dynamic or criminogenic needs assessment. Finally, multiple aspects of management of sexual offenders are discussed, including models of psychosocial treatment, the question of the effectiveness of such treatment, biological interventions, civil commitment, circles of support, and the containment approach to community management. Chapters are authored by both prominent experts and experienced professionals for a breadth of perspective. Among the topics covered: Pedophilic, Hebephilic, Rape, Paraphilic Disorders, and the variety of Non-Contact sexual offending conditions, Personality-related conditions, their association with sexual offending, motivators, and disinhibition in context, Disorders of hypersexuality, Assessments of sexual offenders, including the role of psychological testing, clinical interview approaches, as well as forensic evaluations, Conceptual models of risk assessment, discussion of specific static, dynamic, structured, clinical risk assessment approaches, Models of reviews of
