

DCN-WDV-D Wireless Discussion Unit with Voting

www.boschsecurity.com

BOSCH
Invented for life

- ▶ Five voting buttons
- ▶ Usable as delegate or chairman unit
- ▶ Separate battery pack, easy to change and charge
- ▶ Advanced power saving techniques
- ▶ Low susceptibility to electromagnetic interference

To the participant the most important part of a conference system is the discussion unit. Bosch has built on the elegant design of the DCN Next Generation discussion units to create a new series of wireless discussion units with unrivalled looks and features.

The DCN-WDV-D Wireless Discussion Unit with Voting enables participants to speak, register a request-to-speak, listen to the speaker, and vote.

Functions

Speech intelligibility

Maximum speech intelligibility is guaranteed at all times. Operating in the 2.4 GHz (license free) band, the wireless discussion units produce crystal-clear sound due to a very high signal-to-noise ratio and antenna diversity. This means the signal is transmitted along different propagation paths, ensuring optimal receipt. The system is also protected against interference from mobile phones and other equipment that makes use of Bluetooth or microwave signals.

Security

Wireless communication means extra security considerations. The DCN Wireless system and discussion units therefore feature 128-bits AES encryption to prevent eavesdropping and unauthorized access. Encryption ensures the information within the system remains confidential.

Microphones

A socket is provided to connect the pluggable microphones which are available in short and long stem versions (DCN-MICS and DCN-MICL, to be ordered separately).

Voting

The unit has five voting buttons. The yellow indicator rings around the voting buttons confirm vote selections.

Headphones and loudspeakers

The unit also accommodates two headphone connections, so the speaker can be heard clearly even in situations with excessive background noise.
