

Wound Measurement & Documentation Guide

Measuring Wounds

Measure the length "head-to-toe" at the longest point (A). Measure the width side-to-side at the widest point (B) that is perpendicular to the length, forming a "+". Measure the depth (C) at the deepest point of the wound. *All measures should be in centimeters.*

This ruler is intended for use as a reference only. To prevent infection, do not use this ruler to measure an actual wound.

Using a clock format, describe the location and extent of tunneling (sinus tract) and/or undermining.

The head of the patient is 12:00, the patient's foot is 6:00.

Tunneling/Sinus Tract

A narrow channel or passageway extending in any direction from the base of the wound. This results in dead space with a potential risk for abscess formation.

Undermining

Open area extending under intact skin along the edge of the wound.

If the wound has many landmarks, you may want to trace it before measuring.
