The purpose of analyzing any material used in the production of a questioned document such as an ink or a piece of paper is to compare it with another material elsewhere in the questioned document itself or on another document to determine whether or not they share a common origin. There may also be a need to provide information for the investigator about the possible origins of the document. This latest edition reflects the myriad changes and advances that have occurred in the last 10 to 15 years. Topics covered include current thinking on handwriting interpretation, accidental and deliberate modification of handwriting, the proper collection of samples, a discussion of shredded documents, professional accreditation standards, qualifications and training, and modern digital imaging and analysis of documents and handwriting utilizing software and imaging including reconstruction of an image from erasures, obliteration, and other document altering methods. Handwriting Identification Roy A. Huber, A.M. Headrick, 1999-04-15. Forensic document examination is the study of physical evidence, and physical evidence cannot lie. Only its interpretation can err. Only the failure to find it or to hear its true testimony can deprive it of its value. Roy Huber, author of a definitive review of handwriting identification, this book presents in a general manner how to approach document examination and then in particular how to apply handwriting identification to the document. Types of handwriting are discussed in detail. For the first time in the field of questioned document examination, *Handwriting Identification: Facts and Fundamentals* consolidates the pertinent information from published and unpublished

sources respecting writing that is essential to the expansion of a practitioner's general knowledge of handwriting identification and to the proper education of novices. Written in a question and answer format, the book suggests some of the questions that one might ask of an examiner and provides the answers that knowledgeable and competent examiners should be expected to give.
