Gao Report Boeing Tanker Protest:

Government Contracting William Sims Curry, 2022-12-30 Through three comprehensive editions *Government Contracting: Ethical Promises and Perils in Public Procurement* has been lauded for exposing fraud, incompetence, waste, and abuse. FIWA and analyzing corruption, mismanagement, and ineptitude that defile government contracting. The first two editions thoroughly outlined procurement throughout the contracting cycle, including initial planning, evaluating proposals, contractor selection, contract administration, contract closeout, and auditing. They further provided much-needed guidance on contracting documents, management tools, and processes for addressing negative influences on government contracting. This third edition incorporates the results of a new nationwide study into best public procurement practice, as well as recent examples of real-world procurement fraud cases, offering recommendations for procurement practices to deter fraud. Public procurement tools such as requests for proposals, pro forma contracts, proposal evaluation forms, sole source justification, and approval forms, and other useful tools, including PowerPoint presentations, are provided on a website to accompany the book. This textbook is aimed at postgraduate students and academics working in the fields of public administration, policy, and procurement, along with public procurement professionals. *The Defense Industrial Base* Nayantara D. Hensel, 2016-03-03 The US and international defense industrial sectors have faced many challenges over the last twenty years, including cycles of growth and shrinkage in defense budgets, shifts in strategic defense priorities, and macroeconomic volatility. In the current environment, the defense sector faces a combination of these challenges and must struggle with the need to maintain critical aspects of the defense industrial base as defense priorities change and as defense budgets reduce or plateau. Moreover, the defense sector in the US is interconnected both with defense sectors in other countries and with other industry sectors in the US and global economies. As a result, strategic decisions made in one defense sector impact the defense sectors of other countries, as well as other areas of the economy. Given her academic, corporate, and Department of Defense experience as a leading economist and policy maker, Dr. Nayantara Hensel is perfectly positioned to examine the interrelationship between these forces, both historically and in the current environment, and to assess the implications for the future global defense industrial base. **Transatlantic Defence Procurement** Luke R. A. Butler, 2017-03-02 This volume constitutes the first ever attempt to establish a basis for comparative research on defence procurement regulation. For decades, there has been repeated emphasis on the extent to which barriers to trade in Europe and the US prevent a more competitive defence market. *Transatlantic Defence Procurement* offers the first analysis of the potential impact of defence procurement regulation itself as a barrier to trade between the US and the EU. Part I examines the external dimension of a new EU Defence Procurement Directive, focusing on its implications for third countries, in particular the US. Part II examines foreign access and treatment under US law. Part III maps a future research agenda that is essential for a more systematic understanding of legal barriers to transatlantic defence trade. The book provides context for future initiatives ranging from reformed market access.
