MOP Connection: Refraction and Lenses: sublevels 1 and 2

- Write a one-word synonym for **refraction**. _____
- Refraction occurs when light crosses the boundary between one material and another material. What is the primary cause for this refracting of light upon crossing a boundary?

The diagram below shows the path of a light ray as it travels through air, across the air-water boundary, and through the water. Use the diagram to answer questions #3-#6.

- On the diagram, label —
 - the air-water boundary with a **B**
 - the normal line with an **N**
 - the incident ray with an **I**
 - the refracted ray with an **R**
 - the angle of incidence with a θ_i
 - the angle of refraction with a θ_r

- How many media are there in this diagram? _____
Name them.
- What is meant by the term "medium" in this context?
- Place a noticeable dot at the location where refraction of light takes place.
- For the three situations below, draw a normal line and measure and record the angles of incidence and the angles of refraction.

$\theta_i =$ _____
 $\theta_r =$ _____

$\theta_i =$ _____
 $\theta_r =$ _____

$\theta_i =$ _____
 $\theta_r =$ _____

- As light passes from one medium into another, it refracts. There is only one condition in which light will cross a boundary but not refract. State this condition.

Just in Time Teaching Scott Simkins, Mark Maier, 2023-07-03 Just in Time Teaching JiTT is a pedagogical approach that requires students to answer questions related to an upcoming class a few hours beforehand using an online course management system While the phrase just in time may evoke shades of slap dash work and cut corners JiTT pedagogy is just the opposite It helps students to view learning as a process that takes time introspection and persistence Students who experience JiTT come to class better prepared and report that it helps to focus and organize their out of class studying Their responses to JiTT questions make gaps in their learning visible to the teacher prior to class enabling him or her to address learning gaps while the material is still fresh in students minds hence the label just in time JiTT questions differ from traditional homework problems in being designed not only to build cognitive skills but also to help students confront misconceptions make connections to previous knowledge and develop metacognitive thinking practices Students consequently spend more time on course concepts and ideas but also read their textbooks in ways that result in more effective and deeper learning Starting the class with students work also dramatically changes the classroom learning environment creating greater student engagement This book demonstrates that JiTT has broad appeal across the academy Part I provides a broad overview of JiTT introducing the pedagogy and exploring various dimensions of its use without regard to discipline Part II of the book demonstrates JiTT s remarkable cross disciplinary impact with examples of applications in physics biology the geosciences economics history and the humanities Just in Time Teaching article from The Hispanic Outlook in Higher Education Reprinted with permission from Hispanic Outlook in Higher Education Magazine www.hispanicoutlook.com

Self-Studies of Science Teacher Education Practices Shawn M. Bullock, Tom Russell, 2012-03-21 Part of a vital Springer series on self study practices in teaching and teacher education this collection offers a range of contributions to the topic that embody the reflections of science teacher educators who have applied self study methodology to their own professional development The material recognizes the paradox that lies between classroom science and the education of science teachers the disciplines of science are often perceived as a quest for right answers an unintentional by product of the classroom focus on right answers in student assessment in science In contrast the profession of teaching has few right answers and frequently involves the management of conflicting tensions A dilemma thus arises in science teacher education of how to shift perspectives among student teachers from reductionist to more inclusive attitudes that are open to the

mercurial realities of teaching The self studies presented here are unique fresh and stimulating They include the input of a beginning science teacher as well as science teacher educators from a range of backgrounds and varying levels of experience In addition the volume presents a truly international perspective on the issues with authors hailing from five countries Providing analysis at the leading edge of education theory this collection will make fascinating reading for those teaching science as well as those teaching science teachers
