South African national bibliography ,1999 Classified list with author and title index **Confronting Exclusion**

African Minds,2013 South Africa has made important political strides over the past two decades It has created a framework of democratic legislative executive and judicial institutions that mark a clear break from the apartheid past In theory they are inclusive and offer every citizen equal access to constitutionally protected rights Their capacity to deliver however is coming under increasing pressure and as this happens citizen confidence in their efficacy is waning Much of the pressure which ultimately may affect their legitimacy in the eyes of ordinary citizens stems from the desperation and sense of economic exclusion experienced by those who find themselves at the wrong end of South Africa s grossly unequal society If this decline in trust persists the cohesive effects of the country s democratic institutions will diminish and instability will become an increasingly common feature of political contestation An immediate but only partial remedy to the current state of affairs would be to prioritise transparency accountability and leadership integrity within the system to restore trust in the bona fides of key institutions The longer term challenge will be to counter a growing sense of economic exclusion where violent police action rather than democratic process is increasingly employed to stave off the manifestations of material anxiety experienced by struggling citizens This edition of the Transformation Audit titled *Confronting Exclusion* focuses on instances of such exclusion but as in previous years also prioritises the search for inclusive economic policy and future strategies to address them By looking at each of the four chapter areas it seeks to find answers to the challenge of a society in which the promise of true freedom and equal rights will remain only that until people feel equipped to be in charge of their own destiny and that of their children *South African Schooling: The Enigma of Inequality* Nic Spaull,Jonathan D. Jansen,2019-11-05 This volume brings together many of South Africa s leading scholars of education and covers the full range of South African schooling from financing and policy reform to in depth discussions of literacy numeracy teacher development and curriculum change The book moves beyond a historical analysis and provides an inside view of the questions South African scholars are now grappling with Are there different and preferential equilibria we have not yet thought of or explored and if so what are they In practical terms how does one get to a more equitable distribution of teachers resources and learning outcomes While decidedly local these questions resonate throughout the developing world South Africa today is the most unequal country in the world The richest 10% of South Africans lay claim to 65% of national income and 90% of national wealth This is the largest 90 10 gap in the world and one that is reflected in the schooling system Two decades after apartheid it is still the case that the life chances of most South African children are determined not by their ability or the result of hard work and determination but instead by the colour of their skin the province of their birth and the wealth of their parents Looking back on almost three decades of democracy in South Africa it is this stubbornness of inequality and its patterns of persistence that demands explanation justification and analysis This is a landmark book on basic education in South Africa an essential

volume for those interested in learning outcomes and their inequality in South Africa. The various chapters present conceptually and empirically sophisticated analyses of learning outcomes across divisions of race, class, and place. The book brings together the wealth of decades of research output from top quality researchers to explore what has improved, what has not, and why. Prof Lant Pritchett, Harvard University. There is much wisdom in this collection from many of the best education analysts in South Africa. No surprise that they conclude that without a large and sustained expansion in well trained teachers, early childhood education, and adequate school resources, South Africa will continue to sacrifice its people's future to maintaining the privileges of the few. Prof Martin Carnoy, Stanford University. Altogether, one can derive from this very valuable volume, if not an exact blueprint for the future, then certainly at least a crucial and evidence based itinerary for the next few steps. Dr Luis Crouch, RTI.
