 Hazewinkel,2013-12-01 This ENCYCLOPAEDIA OF MATHEMATICS aims to be a reference work for all parts of mathe matics
 It is a translation with updates and editorial comments of the Soviet Mathematical Encyclopaedia published by Soviet
 Encyclopaedia Publishing House in five volumes in 1977 1985 The annotated translation consists of ten volumes including a
 special index volume There are three kinds of articles in this ENCYCLOPAEDIA First of all there are survey type articles
 dealing with the various main directions in mathematics where a rather fine subdivi sion has been used The main
 requirement for these articles has been that they should give a reasonably complete up to date account of the current state of
 affairs in these areas and that they should be maximally accessible On the whole these articles should be understandable to
 mathematics students in their first specialization years to graduates from other mathematical areas and depending on the
 specific subject to specialists in other domains of science en gineers and teachers of mathematics These articles treat their
 material at a fairly general level and aim to give an idea of the kind of problems techniques and concepts involved in the area
 in question They also contain background and motivation rather than precise statements of precise theorems with detailed
 definitions and technical details on how to carry out proofs and constructions The second kind of article of medium length
 contains more detailed concrete problems results and techniques *Automotive Engineering International* ,2005
