STD 10 Science Practice Paper

Total Marks : 100

SECTION A

* Select and write one most appropriate option out of the four options given for each of the questions [19]

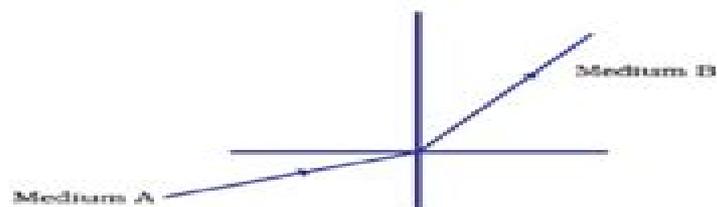

1. Rays from Sun converge at a point 15cm in front of a concave mirror. Where should an object be placed so that size of its image is equal to the size of the object?
- 15cm in front of the mirror.
 - 30cm in front of the mirror.
 - Between 15cm and 30cm in front of the mirror.
 - More than 30cm in front of the mirror.

Ans. :

- b. 30cm in front of the mirror.

Explanation: In this case, $f = -15\text{cm}$ and hence $c = -30\text{cm}$; because radius of curvature is double the focal length. When an object is placed on C, its image is of the same size, inverted and is formed on C.

2. A light ray enters from medium A to medium B as shown in Figure. The refractive index of medium B relative to A will be:

- Greater than unity.
- Less than unity.
- Equal to unity.
- Zero.

Ans. :

- a. Greater than unity.

Explanation: Since light rays in medium B goes towards normal. So it has greater restrictive index and lesser velocity of light with respect to medium A. So refractive index of medium B with respect to medium A is greater than unity.

3. You are given water, mustard oil, glycerine and kerosene. In which of these media a ray of light incident obliquely at same angle would bend the most?
- Kerosene.
 - Water.
 - Mustard oil.
 - Glycerine.
