Part I: Background Material

Answer the following questions after reviewing the background pages for the simulator.

Page 1 – Introduction to Moon Phases

Is there a dark side of the moon? (Note: this question can be effectively answered either yes or no, so it is important to explain your reasoning.)

Yes, there is a dark side of the moon. To us there is a side of the moon we can't see because the moon rotates at the same speed that it rotates around the Earth.

How long does it take the moon to complete one cycle of phases, in days? 29.5 days

If the moon is full today, what phase do you expect it to be at in a week? It will be at the last quarter phase in a week.

How about one month later? Full moon
