Directions

For multiple choice questions, write the letter that best answers the question or completes the statement on the line provided. For other questions, write the answer in the space provided.

- _____ 1. Which factor would **not** be associated with genetic variation in a population of nonrecombining spider genes, which spider types were distributed over 3 continents all over Africa?
- The amount of time separating gene pools
 - The amount of time for interbreeding between populations
 - The amount of time for mutations
 - The amount of time for migration into or out of the gene pool
- _____ 2. Which **is not** true of populations that share a common ancestor but which are separated geographically? (Select all that apply.)
- They may have different gene pools
 - They may have different phenotypes
 - They may have different genotypes
 - They may have different alleles

_____ 3. Which **is not** a true statement about the F_2 generation in self-pollinating heterozygous F_1 populations that are genetically heterogeneous? (Select all that apply.)

- Some alleles in the F_2 generation would have phenotypes corresponding to those seen in the F_1 generation.
- Over time, the F_2 generation would have more phenotypic variation than the F_1 generation.
- The F_2 generation is heterogeneous.
- The F_2 generation has recombined alleles, and some may be different from those seen in the F_1 generation.
