Investigating Slopes Key Unit 04 Lesson 1:

Investigation and Management of Soft Rock Cliffs E. Mark Lee, Alan R. Clark, 2002 Cliff recession and coastal landsliding of soft rock cliffs present significant threats to land use and development Investigation and management of soft rock cliffs presents state of the art guidance on how eroding cliffs can best be managed stressing the need to consider both structural and non structural solutions to cliff recession problems This authoritative text outlines the investigation approaches measurement and monitoring techniques and prediction methods available for obtaining the necessary cliff recession information to support different stages of the decision making process Throughout the book it stresses that every cliff is unique because of the controlling influence of the site geology and geomorphology on the recession process There is therefore no single method to tackling cliff problems investigation and management of each cliff can only be determined on the ground drawing upon expert judgement experience and thorough site investigation and data analysis Investigation and management of soft rock cliffs will provide coastal engineers geotechnical engineers geomorphologists planners and students with an invaluable resource when faced with a range of issues on cliffed coastlines
