

INTRODUCING

Science

Ziauddin Sardar and Boris Van Loon

A 3D molecular model is the central focus of the cover. It features several large, glossy red spheres of varying sizes, some of which are connected by thin, curved rods in shades of green and purple. The background is a solid, vibrant blue. The overall aesthetic is clean and scientific.

Introducing Science Studies:

Introducing Philosophy of Science Ziauddin Sardar, 2015-06-18 What do scientists actually do Is science value free How has science evolved through history Where is science leading us *Introducing Philosophy of Science* is a clear and incisively illustrated map of the big questions underpinning science It is essential reading for students the general public and even scientists themselves

Introducing Science through Images Maria E. Gigante, 2018-06-01 An examination of how images can serve as communication tools to popularize science in the public eye As funding for basic scientific research becomes increasingly difficult to secure public support becomes essential Because of its promise for captivating nonexpert publics the practice of merging art and imagery with science has been gaining traction in the scientific community While images have been used with greater frequency in recent years their value is often viewed as largely superficial To the contrary Maria E Gigante posits in *Introducing Science through Images* the value of imagery goes far beyond mere aesthetics visual elements are powerful communication vehicles The images examined in this volume drawn from a wide range of historical periods serve an introductory function that is they appear in a position of primacy relative to text and like the introduction to a speech have the potential to make audiences attentive and receptive to the forthcoming content Gigante calls them portal images and explicates their utility in science communication both to popularize and mystify science in the public eye Gigante analyzes how science has been represented by various types of portal images frontispieces portraits of scientists popular science magazine covers and award winning scientific images from Internet visualization competitions Using theories of rhetoric and visual communication she addresses the weak connection between scientific communities and the public and explores how visual elements can best be employed to garner public support for research

Science Studies David J Hess, 1997-10-01 The first comprehensive survey of this interdisciplinary field combining a concise overview of key concepts with an original and integrated framework Virtually every aspect of modern life is suffused with the byproducts of scientific research yet the study of science itself what it is how it is done and how it has evolved over time is relatively new By examining the political historical and cultural dimensions of science and technology science studies provides a conceptual tool kit for thinking about scientific in more sophisticated ways In the process of bringing disparate fields together under one tent David J Hess realizes the full promise of science studies long uncomfortably squeezed into other more traditional disciplines He provides a clear discussion of the issues and misunderstandings that have arisen in these interdisciplinary conversations His survey includes recent developments in philosophy sociology anthropology history cultural studies and feminist studies *Science Studies* moves beyond the discipline bound blinders of a sociology history philosophy or anthropology of science By creating its own transdisciplinary field Hess argues science studies can provide crucial conceptual tools for public discussions about the role of science and technology in a democratic society

Doing Science (RLE Edu O) Robin Millar, 2012-05-31 *Doing Science* is unique in seeking to make explicit the links between science

education and science studies These fields of study and their respective academic communities whilst appearing to have many potential points of contact remain surprisingly separate with little apparent recognition of the relevance to the interests of each of the work done within the other tradition Presenting detailed accounts of current research the book highlights the significance of modern science studies for classroom practice and conversely the importance of the classroom and teaching laboratory as a context for science studies The thread which runs through the collection as a whole is children s experience of doing science and the image of science which learners pick up along with the science knowledge understanding and skills they require

Social Studies of Science and Technology: Looking Back, Ahead B.

Joerges,H. Nowotny,2003-09-30 This volume brings together contributions that resemble spotlights thrown on the past twenty five years of science and technology studies It covers a broad range history of science science and politics science and contemporary democracy science and the public science and the constitution science and metaphors and science and modernity and provides a critical overview of how the field of science and technology studies has emerged and developed

Planning, Proposing, and Presenting Science Effectively Jack P. Hailman,Karen B. Strier,2006-11-02 This concise guide to planning writing and presenting research is intended for biology students of all levels especially those in behavioral ecology The reader is guided through a discussion of the nature of scientific research how to plan research and how to obtain funding The authors give advice and guidelines for presenting results at research seminars and scientific meetings and also provide useful tips on preparing abstracts and posters for scientific meetings They discuss how to write an effective C V and give general tips on how to write clearly The book is illuminated throughout with personal examples from the authors own experiences and emphasis is placed on problems associated with field studies All biologists will find this a valuable resource and guide for the early years of their scientific careers and established faculty will find it an essential instructional tool
