

## Gridded-Response Math Problems on the MCA Grades 5–6

Starting in 2005, the Minnesota Comprehensive Assessments in grades 5, 6, 7, 8 and 11 have included gridded-response items. A gridded-response item is similar to a multiple-choice item, except that no answer choices are given. The student solves the problem and then fills in a response grid to give the answer. Each gridded-response item is worth one point.

### **What other tests use gridded-response items? At what grade levels?**

Gridded-response items have been used in other states' assessments for several years. In addition, the GED and SAT use gridded-response items. Most states use gridded-response items beginning in grade 5, though some even use them in grade 4.

### **How are these items scored?**

Gridded-response items are scored in a manner similar to multiple-choice items. A scanner will only read a completed grid.

### **What are the advantages of a gridded-response item?**

Benefits provided by gridded-response items include:

- Allowing students to solve the problem with their preferred method (i.e., expressing probability in fraction or percent format).
- Providing more information about the student's knowledge of a concept; because the student must produce an answer rather than selecting it, students cannot use a different skill (i.e., substitution) to arrive at the correct answer.
- Assessing a benchmark more effectively because a correct response could be in a range (i.e., estimation items).
