Friends' Weekly Intelligencer ,1927 The Public ,1914 Support for the conceptual design stage of effective and resource-efficient offerings Sergio Brambila,2020-10-20 Human activities in the form of production and consumption have increased to an all time high In many cases this increase has resulted in environmental problems such as waste and pollution that in turn affect our health and way of living Societies have proposed different measures to address such environmental problems These range from different waste treatment technologies to alternative business models policy measures and lifecycle thinking in the design of products to mention but a few In this research the focus is on supporting early design activities of what is often called the conceptual design stage with the objective to provide effective and resource efficient offerings The early design activities considered here are planning analysis and evaluation Design researchers have largely supported these three activities with a variety of methods and tools However previous research has shown that design support coming from academia has had a low uptake in industry In this regard the aim of this research is to propose not only useful but also usable support for design practitioners during the conceptual design stage This research is carried out in the manufacturing sector in Sweden where selected companies expressed an interest in collaborating with academia to address more thoroughly effective and resource efficient offerings To better match company needs and research from academia this research took a pragmatic and cross disciplinary approach This research approach along with literature reviews semi structured interviews workshops and questionnaires shows different ways in which support can be made more useful and usable The main gap addressed here is that the knowledge and the related skills of the user of the support have not been sufficiently explored The results include requirements of the user of the support proposed methods and tools derived from the requirements identified and most importantly the knowledge and skills needed by the user of the support The main message of this research is that support could be expanded from methods and tools to include knowledge and skills needed by design practitioners the users of support The flow of support from academia to industry could also be reinforced in a two way flow through a pragmatic and cross disciplinary approach to first and foremost address design practitioners needs M nskliga aktiviteter i form av produktion och konsumtion har aldrig varit h gre Denna kning ver tid har i m nga fall lett till milj problem som avfall och f roreningar vilka i sin tur p verkar v r h lsa och levnadss tt F r att m ta dessa milj problem har olika tg rder f reslagits som tekniker f r avfallshantering alternativa aff rsmodeller policy och livscykel design f r att n mna n gra Fokus i forskningen som presenteras i denna avhandling r p tidiga designaktiviteter vilka ofta kallas det konceptuella designstadiet och som syftar till att ta fram resurseffektiva erbjudanden Detta steg behandlas h r genom att n rmare unders

ka designaktiviteterna planering analys och utvärdering Designforskare har till stor del stöttat dessa tre aktiviteter med en mängd olika metoder och verktyg Emellertid visar tidigare forskning att designstadiet från akademien har ett lågt upptag i industrin Syftet med denna forskning är därför att föreslå ett användbart stadiet som också är användarvänligt för utövare under det konceptuella designstadiet För att uppnå detta genomförs forskningen inom tillverkningssektorn i Sverige där deltagande företag uttryckt ett intresse av att samarbeta med akademien avseende resurseffektiva erbjudanden För att bättre matcha företagens behov med forskning från akademien antas en pragmatisk och tvärvetenskaplig strategi Denna strategi tillsammans med litteratur versikter semistrukturerade intervjuer workshops och enkäter visar hur stadiet i det konceptuella designstadiet kan bli mer användbart och användarvänligt Den huvudsakliga forskningsluckan som tas upp här är att kunskap och relaterade fördigheter hos användaren av stadiet inte har undersökts tillräckligt Resultatet ger en beskrivning av kraven på stadiet som användaren behöver föreslå på metoder och verktyg som baseras på de identifierade kraven och viktigast av allt den kunskap och de fördigheter som användaren av stadiet behöver ha Huvudbudskapet är att stadiet kan utvidgas från att omfatta metoder och verktyg till att även inkludera behovet av kunskap och fördigheter hos designutövare det vill säga användarna av supporten Stadiet från den akademiska världen till industrin kan också förstärkas genom att bli ett tvärvetenskapligt som med en pragmatisk och tvärvetenskaplig strategi först och främst adresserar användarens behov *The Service Sheet* New York State College of Agriculture, 1919
