

# EMT Practice Scenarios

Name: Chloe Smith

Date: 01/01/2024

Here are several practice scenarios for emergency services providers. Review these scenarios with colleagues or team members. Focus on identifying key information, discussing critical factors, and considering appropriate responses based on your knowledge and experience.

As you analyze each situation, assess the associated risks, identify any additional information that may be necessary, and consider potential safety concerns. Be sure to address issues such as managing bystanders and apply any relevant protocols or best practices in your decision-making process.

## Psychiatric emergency

You are dispatched to a home where a 32-year-old male has reportedly been exhibiting signs of severe agitation and confusion. He has been experiencing increasing anxiety and delusional thoughts over the past few days. Family members report that he has a history of mental health issues, including depression, but has recently stopped taking his prescribed medications. The patient is shouting incoherently and is resisting attempts to engage with him. There are no known weapons present, but the situation is escalating, and there are bystanders present in the vicinity.

### Considerations:

Ensure scene safety and call for backup if needed. Assess the patient's airway, breathing, and circulation.

Attempt verbal deescalation.

Obtain vital signs and check for signs of distress.

If necessary, involve law enforcement or administer sedation.

Transport to an appropriate facility and document all actions taken.
